DATE MAILED: 01/11/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No. 10/814,997	Applicant(s) CLARK ET AL.	
	Examiner Christopher W. Fulton	Art Unit 2859	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Oath/Declaration*

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
It does not identify the citizenship of each inventor.

### *Claim Objections*

2. Claim 34 is objected to because of the following informalities: Claim 34 lacks antecedent basis for "the second guide component". It appears as if claim 34 should depend from claim 28 and not claim 1. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 8-10, 15-20, 22, 23, 28-33, 35, and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller.

The device as claimed is disclosed by Miller with a first alignment means 11 with guide holes 16, multiple paths, and dual perpendicular arms and a second alignment means 22 removably and adjustably positioned within the first alignment means.

5. Claims 1, 7, 15, 21, 28, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Channell.

The device as claimed is disclosed by Channell with a first alignment means 10 and a second alignment means 12 removably and adjustably positioned within the first alignment means with the second alignment means having level means 20.

6. Claims 1 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Walton.

The device as claimed is disclosed by Walton with a first alignment means 18 , multiple paths, and dual perpendicular arms and a second alignment means 28 removably and adjustably positioned within the first alignment means with the second alignment means having multiple paths and dual perpendicular arms.

*Claim Rejections - 35 USC § 103*

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 21 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller in view of Channell.

The device as claimed is disclosed by Miller as stated in the rejection recited above for claims 1-6, 8-10, 15-20, 22, 23, 28-33, 35, and 36, but lacks levels on the second alignment means. Channell teaches using levels 20 on a second alignment means which is inserted in the first alignment means. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to add leveling means to the second alignment means of Miller as taught by Channell to further level the device.

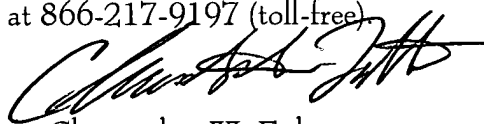

*Allowable Subject Matter*

10. Claims 24-27 and 37-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
